About Us

Registered in Colorado, USA · Delivery team in Rawalpindi & Islamabad, Pakistan

The Tetra Technology LLC was formed in Colorado, USA in 2023 to give international clients a US-based point of contact, backed by a full production team of developers, sysadmins, marketers and store managers working out of Pakistan.

The name comes from "tetra" — four. From day one the company was structured around four disciplines that are usually split across separate vendors: development, hosting, marketing and e-commerce operations. Keeping all four in-house means fewer handoffs, faster fixes, and one team that actually understands the whole business it's building for.

Today, that structure supports 130+ delivered websites and applications for clients across the USA, UK, UAE, KSA, Canada, Oman and Pakistan.

Haseem Ajaz
FOUNDER & CEO

Leads client strategy and infrastructure decisions across every active project.

Full-Stack, Not Fragmented

The team that builds your site also hosts and markets it.

Global Client Base

Active clients across the USA, UK, UAE, KSA, Canada, Oman and Pakistan.

Fast, Predictable Delivery

Fixed milestones and weekly updates from wireframe to launch.

Support That Doesn't Disappear

Most client relationships outlive the original project.

Let's build something together.

Whether it's a new website, a server migration, an SEO push, or a store that needs to be built and run — tell us what you need and we'll route it to the right team the same day.
